# Segment Growth Driven by Demand Tailwinds and Operational Leverage

Revenue (₹ Mn)

EBIT (₹ Mn)

Margin

- The segment delivered strong growth during the quarter, driven by sustained demand momentum across key sectors. Increased government spending, improved project execution, continued strength in real estate, and an inflationary trend in commodity prices were key contributors. The domestic business grew by 27% YoY, with cables growth once again outpacing wires. Both channel and institutional business showed healthy traction
- The international business declined 24% YoY in the quarter due to the rollover of a large order into the next quarter. For the full year, it contributed 6.0% to the consolidated revenues. A strong rebound is expected in FY26, supported by a robust order book and a favourable demand environment across key markets
- Margins improved ~140 bps QoQ to 15.1% driven by operating leverage and a favourable product-mix, although partially offset by the lower contribution from the international business
